# CONTENTS

## No. 1 (MAY 1943)

	PAGE
1. The nutrition of the carrot. By R. M. WOODMAN . . . . .	I
2. The prevention of seed-borne diseases of flax by seed disinfection. By A. E. MUSKETT and J. COLHOUN. (With Plate 1) . . . . .	7
3. Effect of seed treatment on emergence of peas. By G. T. S. BAYLIS, R. S. DESHPANDE and I. F. STOREY. (With 3 Text-figures) . . . . .	19
4. An investigation into the 'stripe' disease of narcissus. II. Experiments on the virus agent and its spread. By JOHN CALDWELL and IAN W. PRENTICE. (With 3 Text-figures) . . . . .	27
5. A survey of potato aphides in the South-Western Agricultural Advisory Province. By L. N. STANILAND, A.R.C.S., D.I.C. (With 9 Text-figures) . . . . .	33
6. The mode of action of pyrethrum on the cockroach, <i>Periplaneta americana</i> L. By D. N. ROY, S. M. GHOSH and R. N. CHOPRA . . . . .	42
7. Materials for a study in animal competition. The fauna of the sewage bacteria beds. Part II. By LL. LLOYD, D.Sc. . . . .	47
8. A comparative account of the life cycles of <i>Lumbricillus lineatus</i> Mull. and <i>Enchytraeus albidus</i> Henle in relation to temperature. By T. B. REYNOLDSON, B.Sc., Ph.D. (With 3 Text-figures) . . . . .	60
9. The resistance of potato varieties to <i>Heterodera schachtii</i> Schmidt, the potato-root eelworm. By ALAN R. GEMMELL, Ph.D. . . . .	67
10. The statistical treatment of toxicological data relating to more than one dosage factor. By D. J. FINNEY, M.A. (With 2 Text-figures) . . . . .	71
11. <i>Rhizoctonia solani</i> associated with a root rot of cereals in Norfolk. By W. A. R. DILLON WESTON and S. D. GARRETT . . . . .	79
12. Proceedings of the Association of Applied Biologists: 9 October 1942. Discussion on potato virus diseases: I. Potato virus diseases: introduction. By G. SAMUEL, M.Sc. (With 1 Text-figure.) II. Some properties of the potato viruses. By F. C. BAWDEN, M.A. III. Some practical difficulties in the production of virus-free seed potatoes. By KENNETH M. SMITH, D.Sc., F.R.S. IV. Some factors influencing the health of seed potato stocks in North Wales. By T. WHITEHEAD, Ph.D., M.Sc., A.R.C.Sc. (With 6 Text-figures.) V. Ecology of potato aphides in North Wales. By I. THOMAS, Ph.D. and F. H. JACOB, M.Sc. (With 4 Text-figures.) VI. The life history of <i>Aphis (Doralis) rhamni</i> B.d.F. in eastern England. By J. P. DONCASTER, B.A. VII. The spread of potato virus diseases in the field. By P. H. GREGORY, Ph.D. VIII. Potato breeding for virus resistance. By GEORGE COCKERHAM, Ph.D. . . . .	80

## No. 2 (AUGUST 1943)

1. War problems and post-war responsibilities of the Association. By HUBERT MARTIN. (With Frontispiece) . . . . .	109
2. Nitrogen nutrition of the onion. By R. M. WOODMAN . . . . .	116
3. Behaviour of the fungus <i>Rhizoctonia solani</i> Kuhn in the soil. By I. D. BLAIR, M.Agr.Sc. (N.Z.), Ph.D. (Lond.) . . . . .	118

	PAGE
4. Experiments to determine the effect of certain wood preservatives on the growth and cropping of the cultivated mushroom ( <i>Psalliota campestris</i> ). By N. H. PIZER and H. H. GLASSCOCK	128
5. Value of phloem necrosis in the diagnosis of potato leaf-roll. By F. M. L. SHEFFIELD, D.Sc. (With Plate 2)	131
6. The moisture content of timber in relation to attack by <i>Lyctus</i> powder-post beetles. By E. A. PARKIN, M.Sc., Ph.D., D.I.C. (With 3 Text-figures)	136
7. Experiments on the poisoning of honeybees by insecticidal and fungicidal sprays used in orchards. By C. G. BUTLER, D. J. FINNEY and P. SCHIELE. (With 2 Text-figures)	143
8. Field studies of potato-root eelworm, <i>Heterodera rostochiensis</i> Wollenweber, 1938-40. By H. W. MILES, D.Sc., Ph.D., V. E. HENDERSON, B.A. and M. MILES, M.Sc.	151
9. Observations on the biology of the potato-root eelworm, <i>Heterodera schachtii</i> Schmidt. By A. E. W. BOYD	157
10. Stimulation of larval emergence in <i>Heterodera schachtii</i> Schmidt, by certain concentrations of silver compounds. By A. E. W. BOYD	161
11. Field experiments on the control of sheep maggots. By W. ROGIE ANGUS, I. THOMAS and O. G. WILLIAMS. (With 3 Text-figures)	164
12. Studies in the mechanism of fungicidal action. V. Non-metallic and sodium dithiocarbamic acid derivatives. By A. F. PARKER-RHODES. (With 4 Text-figures)	170
13. Preliminary experiments on the use of oil-soluble copper compounds as fungicides. By C. J. HICKMAN, R. W. MARSH and E. H. WILKINSON	179
14. Experiments on the rate of spread of narcissus stripe in the field. By LILIAN E. HAWKER	184
15. On the control of potato skin spot disease. By C. E. FOISTER	186
16. Note: Virus nomenclature. By G. C. AINSWORTH	187
17. Proceedings of the Association of Applied Biologists: 4 December 1942. Symposium on the honey-bee: The position of the honey-bee in the national economy. Adult bee diseases. By C. G. BUTLER. Brood diseases of the honey-bee. By P. S. MILNE. Orchard spray poisoning of the honey-bee. By G. A. CARTER. Work on bee repellents. Management of colonies for pollination. By C. G. BUTLER. The design and interpretation of bee experiments. By D. J. FINNEY. The discussion. Compiled by E. P. JEFFREE	189
18. Report of the Council of the Association of Applied Biologists for the year 1942	198
19. Report of the Honorary Treasurer for the year ended 31 December 1942	199

### No. 3 (NOVEMBER 1943)

1. The depletion of starch from the sapwood of the ash ( <i>Fraxinus excelsior</i> ) and its relation to attack by powder-post beetles ( <i>Lyctus</i> spp.). By F. Y. HENDERSON. With an appendix by E. W. BENNISON	201
2. Studies in the physiology of the onion plant. I. An investigation of factors concerned in the flowering ('bolting') of onions grown from sets and its prevention. Part I. Production and storage of onion sets, and field results. By O. V. S. HEATH. (With Plate 3 and 1 Text-figure)	208

3. Black scurf and stem canker of potato ( <i>Corticium Solani</i> Bourd. & Galz.). Field studies on the use of clean and contaminated seed potatoes and on the contamination of crop tubers. By T. SMALL, Ph.D., A.R.C.S.	221
4. Investigation into the production of bacteriostatic substances by fungi. II. A method for estimating the potency and specificity of the substances produced. By W. H. WILKINS and G. C. M. HARRIS. (With Plate 4)	226
5. Direct microscopical observations upon the rumen population of the ox. I. Qualitative characteristics of the rumen population. By FRANK BAKER	230
6. The comparison of sheep-tick populations ( <i>Ixodes ricinus</i> L.). By A. MILNE, M.A., Ph.D.	240
7. Notes on Thysanoptera found on flax ( <i>Linum usitatissimum</i> L.) in the British Isles. By G. D. MORISON	251
8. Biological methods of determining the insecticidal values of pyrethrum preparations (particularly extracts in heavy oil). By F. TATTERSFIELD and C. POTTER. (With 11 Text-figures)	259
9. A film technique for the biological evaluation of pyrethrum-in-oil insecticides for use against stored product insects in warehouses. By E. A. PARKIN and A. A. GREEN. (With 5 Text-figures)	279
10. The preparation of a standard pyrethrum extract in heavy mineral oil, with observations on the relative toxicities of the pyrethrins in oil and aqueous media. By J. T. MARTIN. (With 1 Text-figure)	293

No. 4 (DECEMBER 1943)

1. The natural cross-pollination of crop plants with particular reference to the radish. By M. B. CRANE and K. MATHER. (With 6 Text-figures)	301
2. Studies in the physiology of the onion plant. I. An investigation of factors concerned in the flowering ('bolting') of onions grown from sets and its prevention. Part 2. Effects of day length and temperature on onions grown from sets, and General Discussion. By O. V. S. HEATH. (With Plate 5 and 3 Text-figures)	308
3. The nutrition of the radish. By R. M. WOODMAN	319
4. Notes on basal rot of narcissus. I. A comparison of various methods of using formalin in connection with the hot-water treatment against eelworm. By LILIAN E. HAWKER	323
5. Notes on basal rot of narcissus. II. Infection of bulbs through dying roots in summer. By LILIAN E. HAWKER	325
6. Factors influencing infection of the tomato by <i>Verticillium albo-atrum</i> . By F. M. ROBERTS, Ph.D.	327
7. The appearance and spread of mosaic infection in the tomato crop and the relation to seed transmission of the virus. By IRESON W. SELMAN. (With 5 Text-figures)	331
8. The reactions of potato varieties to viruses X, A, B and C. By GEORGE COCKERHAM. (With Plate 6)	338
9. Studies on the spread of certain plant viruses in the field. By KENNETH M. SMITH, F.R.S. (With 2 Text-figures)	345
10. Further investigations on the biology and control of the carrot fly ( <i>Psila rosae</i> F.). By F. R. PETHERBRIDGE, M.A. and D. W. WRIGHT, M.A. (With 3 Text-figures)	348
11. Materials for a study in animal competition. Part III. The seasonal rhythm of <i>Psychoda alternata</i> Say and an effect of intraspecific competition. By LL. LLOYD. (With 1 Text-figure)	358

	PAGE
12. The stem and bulb eelworm, <i>Anguillulina dipsaci</i> (Kühn, 1858): the importance of collating evidence on the behaviour of biologic strains. By G. Fox WILSON. (With Plates 7 and 8 and 1 Text-figure) . . . . .	364
13. The effect of a chemical soil sterilizing agent on the subsequent development of tomato plants. By J. H. WESTERN and R. STEWART. (With Plate 9) . . . . .	370
14. Studies in the mechanism of fungicidal action. VI. Water. By A. F. PARKER-RHODES. (With 2 Text-figures) . . . . .	372
15. Studies upon the copper fungicides. VI. The solution of copper from Bordeaux and Burgundy mixtures. By R. L. WAIN and E. H. WILKINSON. (With 1 Text-figure) . . . . .	379
16. Proceedings of the Association of Applied Biologists: 11 June 1943. Discussion on composts, their preparation and value: I. Composts, their preparation and value. By E. M. CROWTHER. II. The use of composts in market-gardening. By F. A. SECRETT. III. The use and significance of composts in forestry. By M. C. RAYNER. IV. The use of straw in glasshouse soils. By W. F. BEWLEY . . . . .	392

# INDEX OF AUTHORS

	PAGE		PAGE
AINSWORTH, G. C. Note: Virus nomenclature . . .	187	FOISTER, C. E. On the control of potato skin spot disease . . .	186
ANGUS, W. ROGIE, THOMAS, I. and WILLIAMS, O. G. Field experiments on the control of sheep maggots. (With 3 Text-figures) . . .	164	FOX WILSON, G. The stem and bulb eelworm, <i>Anguillulina dipsaci</i> (Kühn, 1858): the importance of collating evidence on the behaviour of biologic strains. (With Plates 7 and 8 and 1 Text-figure) . . .	364
BAKER, FRANK. Direct microscopical observations upon the rumen population of the ox. I. Qualitative characteristics of the rumen population . . .	230	GARRETT, S. D. See Dillon Weston, W. A. R. . . .	79
BAWDEN, F. C. Some properties of the potato viruses . . .	28	GEMMELL, ALAN R. The resistance of potato varieties to <i>Heterodera schachtii</i> Schmidt, the potato-root eelworm . . .	67
BAYLIS, G. T. S., DESHPANDE, R. S. and STOREY, I. F. Effect of seed treatment on emergence of peas. (With 3 Text-figures) . . .	19	GHOSH, S. M. See Roy, D. N. et al. . . .	42
BENNISON, E. W. See Henderson, F. Y. . . .	201	GLASSCOCK, H. H. See Pizer, N. H. . . .	128
BEWLEY, W. F. The use of straw in glasshouse soils . . .	399	GREEN, A. A. See Parkin, E. A. . . .	279
BLAIR, I. D. Behaviour of the fungus <i>Rhizoctonia solani</i> Kühn in the soil . . .	118	GREGORY, P. H. The spread of potato virus diseases in the field . . .	104
BOYD, A. E. W. Observations on the biology of the potato-root eelworm, <i>Heterodera schachtii</i> Schmidt . . .	157	HARRIS, G. C. M. See Wilkins, W. H. . . .	226
— Stimulation of larval emergence in <i>Heterodera schachtii</i> Schmidt, by certain concentrations of silver compounds . . .	161	HAWKER, LILIAN E. Experiments on the rate of spread of narcissus stripe in the field . . .	184
BUTLER, C. G. The position of the honey-bee in the national economy. Adult bee diseases . . .	189	— Notes on basal rot of narcissus. I. A comparison of various methods of using formalin in connection with the hot-water treatment against eelworm . . .	323
— Work on bee repellents. Management of colonies for pollination . . .	195	— Notes on basal rot of narcissus. II. Infection of bulbs through dying roots in summer . . .	325
BUTLER, C. G., FINNEY, D. J. and SCHIELE, P. Experiments on the poisoning of honeybees by insecticidal and fungicidal sprays used in orchards. (With 2 Text-figures) . . .	143	HEATH, O. V. S. Studies in the physiology of the onion plant. I. An investigation of factors concerned in the flowering ('bolting') of onions grown from sets and its prevention. Part 1. Production and storage of onion sets, and field results. (With Plate 3 and 1 Text-figure) . . .	208
CALDWELL, JOHN and PRENTICE, IAN W. An investigation into the 'stripe' disease of narcissus. II. Experiments on the virus agent and its spread. (With 3 Text-figures) . . .	27	— Studies in the physiology of the onion plant. I. An investigation of factors concerned in the flowering ('bolting') of onions grown from sets and its prevention. Part 2. Effects of day length and temperature on onions grown from sets, and General Discussion. (With Plate 5 and 3 Text-figures) . . .	308
CARTER, G. A. Orchard spray poisoning of the honey-bee . . .	195	HENDERSON, F. Y. The depletion of starch from the sapwood of the ash ( <i>Fraxinus excelsior</i> ) and its relation to attack by powder-post beetles ( <i>Lyctus</i> spp.). With an appendix by E. W. Bennison . . .	201
